I. PURPOSE

The purpose of this directive is to establish guidelines for protecting crime scenes.

II. SUMMARY OF CHANGE

This policy is due for triannual review, and language that pertains to the videography of crime scenes has been omitted.

III. POLICY

It is the policy of the Richmond Police Department to establish proper procedures for crime scene protection to ensure efficient and effective criminal investigations. This directive does not list the Department's direct investigative functions in each specific category, such as homicide, rape, robbery, etc., but identifies those elements common to most investigations.

The success or failure of a criminal investigation depends significantly upon the thoroughness and immediacy of the preliminary investigation. What the officer does or fails to do in the earliest phase of the investigation may determine whether the perpetrator is identified and apprehended or goes undetected. Positive and effective police action in this vital stage is also essential in deciding the case's outcome in court.

IV. ACCOUNTABILITY STATEMENT

All employees are expected to fully comply with the guidelines and timelines outlined in this general order. Failure to comply will result in appropriate corrective action. Responsibility rests with the Division Commander to ensure that any policy violations are investigated, and proper training, counseling and/or disciplinary action is initiated.

This directive is for internal use only, and does not enlarge an employee's civil liability. It should not be construed as creating a higher standard of safety or care in an evidentiary sense concerning third-party claims. Violation of this directive, if proven, can only form the basis of a complaint by this Department and then only in a non-judicial administrative setting.

V. PROCEDURE
