

Department of Public Utilities

Westtower Drive and Whitlone Improvement Project

Project Information

This project provides upgrades to the existing stormwater conveyance system by providing new drop inlets, manholes, approximately 1,400 feet of new storm pipe, and ditches to alleviate flooding that occurs during and after heavy rain events. All necessary easements have been acquired and the project design and permit acquisition is complete.

Project Schedule

Project Assignment: Completed

Survey & Preliminary Design: Completed

Engineering Design: Completed (Timmons Group)

Construction Assignment: Construction anticipated to begin January 2023 for an estimated five months

What Happens Next:

Construction equipment and traffic will be in the neighborhood daily and periodic road closures can be expected. We apologize for the inconvenience and greatly appreciate your patience as these improvements are made.

Project Benefits:

Will improve the flow within the drainage channels and relocate and establish easements necessary for any future maintenance.
