

Department of Public Utilities

Sanitary Sewer Replacement Work – Libbie and Cary

Project Summary

The sanitary sewer replacement project at Libbie and Cary has been underway since January 2023. The City of Richmond has been replacing deteriorated sewer mains which are at risk of imminent failure, reinstating associated sewer service laterals and making multiple repairs to a failing sewer main. The worksite is bounded to the north by Matoaka Road, to the south by Cary Street Road, to the east by Tuckahoe Blvd, and to the west by Maple Avenue.

Phase 2 of this project started on Tuesday, March 7 and closed Cary Street Road to thru traffic in both directions from Three Chopt Road to Tuckahoe Boulevard.

In addition to the ongoing sanitary sewer replacement work, water lines and storm drain inlets have been repaired or renewed as part of this project as conditions warranted.

Updated Timeline

The full closure of Cary Street Road has allowed the project work to progress ahead of schedule and well ahead of the originally scheduled August completion date. The sanitary sewer replacement work is projected to be complete by June 5. The Department of Public Works will conclude with scheduled paving and restoration for sections of the project area, with a completion date by June 30.

We appreciate the patience of residents, business owners and commuters as this critical infrastructure work takes place.
