Sanitary Sewer Replacement Work – 3200 North Avenue

Project Summary

The City of Richmond Department of Public Utilities (DPU) has been replacing deteriorated sewer mains at risk of imminent failure and reinstating associated sewer service laterals in the alley along the 3200 block of North Avenue. Associated work also includes water relocation and water bypass operations that require partial shutdown of the alley between North Avenue and Garland Avenue at any given time. The worksite is bounded to the north by W. Meredith Street, to the south by W. Gladstone Avenue, to the east by North Avenue, and to the west by Garland Avenue.

Updated Project Schedule

Phase 2 is currently ongoing with the northern half of the alley closed to through traffic as shown below.

Sanitary sewer replacement is anticipated to end August 2024, followed by final water line installation. The City will restore the alley to its original condition once all the work is complete. Any personal property damaged by the City or its contractors during construction will be addressed at that time as well.

Impact to Trash Collection

Since this project impacts the alley that many residents utilize to access the rear of their homes as well as trash collection services, the City of Richmond DPU and Department of Public Works (DPW) have been working together to minimize disruption while simultaneously delivering a successful project. In order to ensure your trash is picked up on the established collection day, please move your trash can to the nearest available location outside of the construction zone so DPW can access the cans. If you are physically unable to move the cans, please reach out to the DPU contact below for coordination.

We appreciate the patience of residents as this critical infrastructure work takes place.

If you have questions or comments about this project, please contact the Department of Public Utilities.
