

# Arthur Ashe Boulevard

## BRIDGE PROJECT

### PROJECT OVERVIEW

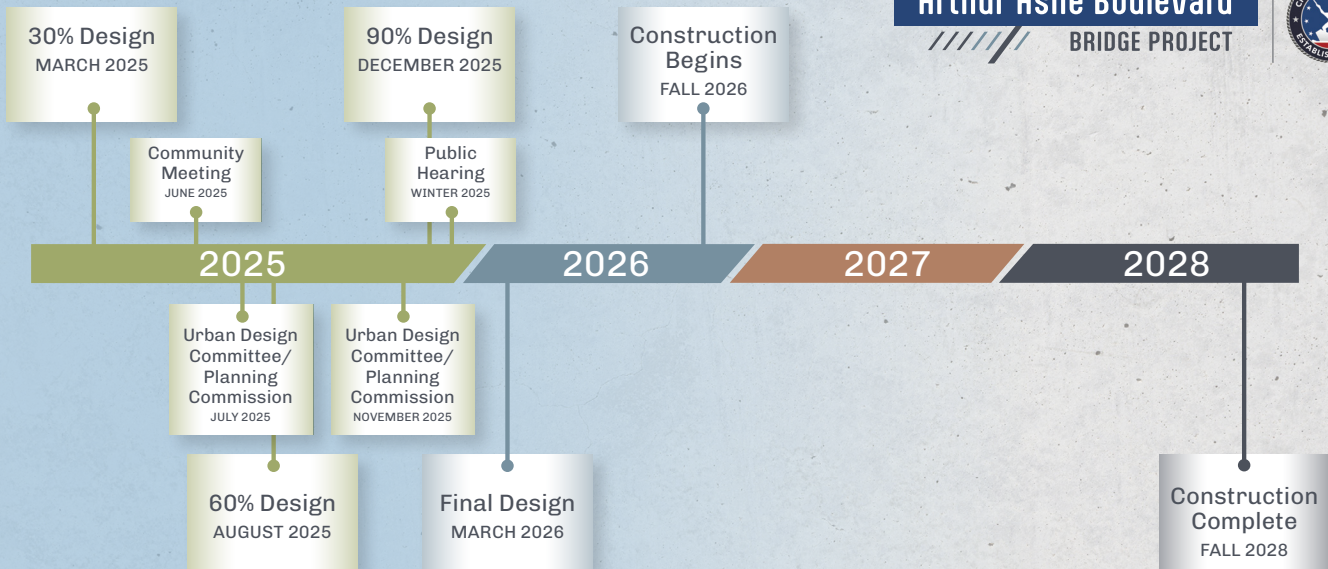

The City of Richmond has received federal funding to replace the existing multimodal bridge structure over the CSX Railroad at the City's crossroads between Broad Street and Interstate I-64/I-95, adjacent to Scott's Addition and the Diamond District. The new bridge will replace the at-risk, over 75-year-old bridge that has exceeded its useful life. The new bridge will enhance safety for motorists, pedestrians and cyclists, and will be an asset to the City as part of Richmond's infrastructure and community revitalization efforts.

## PROJECT SCHEDULE

## Arthur Ashe Boulevard BRIDGE PROJECT

## PROJECT AREA

## BENEFITS

- **Improve Access:** The new bridge will enhance connectivity fostering a multimodal transportation network.
- **Enhance Safety:** Separated and protected facilities for people who walk, bike, and roll will increase the safety, security, and comfort.
- **Economic Development:** Improved access to businesses and attractions will bolster economic growth and neighborhood revitalization efforts.

## CONSTRUCTION

- The bridge will remain open during construction.
- Sequence of Construction schedules will be provided to the public.
- The City will work with the community to enhance safety and reduce disruptions.

**PROJECT COST** ..... \$38 million

## FUNDING

Federal ..... \$18.4 million  
CSX ..... \$4.0 million  
City ..... \$15.6 million
